## ROUNDING TO THE NEAREST 10 SHEET 1

Fill in the number marked by the arrow.

Draw an arrow to show where the nearest 10 is.

Remember: if the number is in the middle, it will round up to the next 10.

### Example

Name \_\_\_\_\_

Date \_\_\_\_\_

## ROUNDING TO THE NEAREST 10 SHEET 3

Follow these simple steps to round a number to the nearest 10:

- if the number is already a multiple of 10, don't change it!
- if the ones digit is less than 5 then the number is rounded down. Simply change the ones digit to zero.
- if the ones digit is 5 or more, the number is rounded up. Simply add one to the tens digit and change the ones digit to zero.

### Examples

27 is rounded **up** to 30 because the ones digit is 7.

53 is rounded **down** to 50 because the ones digit is 3.

30 is unchanged because it is already a multiple of 10.

55 is rounded **up** to 60 because the ones digit is 5.
