1 (a) Which angles are
   • right   • acute   • obtuse?

   (b) List the angles in order, starting with the smallest.

2 Which shape has

   (a) only two acute and only two obtuse angles
   (b) two right angles, one acute angle and one obtuse angle
   (c) **all** of its angles obtuse
   (d) **none** of its angles obtuse
   (e) only two acute angles and only one obtuse angle
   (f) three obtuse angles and one acute angle
   (g) one right angle, two acute angles and one obtuse angle?

3 Draw a **quadrilateral** which has two **opposite** acute angles
and two **opposite** obtuse angles.
